

3 Lab Module

“The International Space Station is a phenomenal laboratory, an unparalleled test bed for new invention and discovery. Yet I often thought, while silently gazing out the window at Earth, that the actual legacy of humanity’s attempts to step into space will be a better understanding of our current planet and how to take care of it.”

Chris Hadfield, Canadian Astronaut

A lab module houses a battery of experiments.

The modular plug and play infrastructure allows for easy exchange of equipment.
